Dear Dr. Offord,

BBC Deliberate Distortion of Truth

I wrote to you on the 24 May 2021(see attached) regarding the Dyson Report and the Balen Report of 2004 in to the BBC's deliberate manipulation of facts and asked what steps HM government Department of Justice and/or Department of Digital, Culture, Media and Sport intend to take to investigate the cover up that prevented the publication of the Balen Report. Some two and a half years later I still await your response and that of the ministry.

I have over the last six days listened to, viewed the TV reports, as well read on their web site the coverage the BBC has provided regarding the **POGROM** that the terrorist organisation Hamas perpetrated on Israel.

Firstly, the absolute failure of the journalists, newscasters, international editors to identify Hamas as terrorists but using terminology as 'gunmen', militants and fighters instead of **TERRORISTS** depicts anti-Semitic racial bias – for any other people be it bombers in the UK, USA etc. such actions would be classified as terrorism, the exception being made by the BBC comes when their aim is to kill Jews in COLD BLOOD.

The BBC throws up the excuse it is written in their Editorial Guidelines – exactly who wrote these guidelines and who approved this utter nonsense and why have they not been rescinded in the last six days. Who failed to take this decision must be the question that the Secretary of State Department of Culture, Media and Sport must immediately address as well as Members of Parliament.

On Tuesday morning on the BBC Radio 4 Today program the BBC International Editor Bowen was asked by the anchor in Jerusalem, Martha Kearney, to describe the scene at Kfar Aza but he somehow managed to wiggle out of mentioning the BEHEADINGS of the 40 plus babies and children and put over his political views of the situation, if he was such an expert he would be advising the UK government instead of working for the BBC! This is not acceptable, Bowen has over the decades demonstrated a pro-Arab stance and as such his reporting is blatantly bias against Israel and Jews. When I heard this broadcast I was utterly flabbergasted that this man has the temerity to turn around facts and truth. This is all clearly documented by Camera UK on its web site https://camera-uk.org/2023/10/12/bbcs-bowen-does-whataboutery-in-kfar-aza/?utm_medium=email&utm_source=es. It is time he was immediately removed from his post.

As a former employee of the BBC you are well aware of the workings of the BBC. It would appear they are more concerned with pacifying the UK and international Islamic population.

I am aware of the Prime Minister's views on this but it is totally unsatisfactory for this situation to continue. Accordingly, I should like to question what immediate steps HM Government intends to take to rectify the situation given that their reporting incites and is responsible for enhancing international anti-Semitism.

Please don't, as you have often done in the past given me your personal views, as part of your duty under the Representation of the People Act to your constituents this letter must be forwarded to the relevant government departments for a response.

Yours sincerely

Dear Dr Offord,

Lord Dyson Report into the Princess Diana Newsnight interview

Lord Dyson identified serious breaches of honesty within the organization including a cover up within the upper echelons of the BBC that is extremely disturbing.

This report covered events some 25 years ago and totally discredits the honesty and integrity of the BBC and clearly identifies the lengths it has gone to withhold honest disclosure. As such it indicates that it has been far from objective in its reporting.

As a result of serious complaints regarding the BBC's subjective reporting of the Arab – Israel conflict the organization commissioned the Balen investigation. The corporation, despite it being publically funded, has refused to disclose the contents of the findings of the 20000 word investigation into the 2004 Balen Report.

Given the disclosure contained in the Dyson Report there is clear evidence that there is a cover up since the corporation refuses to publish the document, making ridiculous claims as to its "right" to do so. I am aware that you are a former employee of the BBC and may be aware of some of the inner workings of the organization, particularly within the news gathering and distribution in respect to the World at One, etc, but the public has the right to know as Lord Dyson disclosed..

Under the circumstances prevailing on the basis of the disclosures within the Dyson Report I should like to enquire what steps HM government Department of Justice and/or Department of Digital, Culture, Media and Sport intend to take to investigate the cover up that prevented the publication of the Balen Report.

Yours sincerely
